SIMPLE PROGRAMME · UNFPA BANGLADESH · HANDOVER PACK

Indicator Data Dictionary

Every dashboard indicator: its code, target, source form, and exactly how the number is computed · Version 1.0 · August 2026 · Prepared by the M&E Advisor for CIPRB

How to read this document

Every number on the SIMPLE dashboard is computed by one function in the codebase (`indicators/bandhu.py` , `indicators/phd.py` , `indicators/ciprb.py`), and the monthly reports call the same functions, so a report can never disagree with the screen. Unless marked otherwise, **only manager-APPROVED records count**. Targets come from the UNFPA-provided M&E frameworks and are editable in the dashboard target settings without code changes.

Bandhu · 18 indicators

Code	Indicator	Target	Source form	How it is counted
1.1	KP individuals reached (Mother List registry)	4,000	Bandhu 0 · Mother List	Count of registered clients (registration auto-approves by design)
1.2	GBV survivors screened, supported and referred	120	Bandhu 1 · F-01 Wellness Logbook	APPROVED logbook visits carrying the GBV service flag
1.3	Individuals receiving MHPSS counselling	48	Bandhu 1 · F-01 Wellness Logbook	APPROVED logbook visits carrying the mental-health flag
1.4a	Outreach and health-education sessions	288	Bandhu 2 · Outreach + group education	APPROVED outreach sessions plus group-education sessions
1.5a	KP receiving STI services	2,000	Bandhu 1 · F-01 Wellness Logbook	APPROVED logbook visits carrying the STI-screening flag
1.5b	KP receiving HIV testing services	2,000	Bandhu 1 · F-01 Wellness Logbook	APPROVED logbook visits carrying the HTC flag
1.6	KP clinic supported (Dhaka)	1	Service-centre register	Active KP clinic exists
1.7	Clients referred and linked to ART / diagnostics	25	Bandhu 1 · referral section	APPROVED referrals
1.8	Drop-in Centres established	8	Service-centre register	Active DiC count
1.9	Mobile outreach health camps	40	Bandhu 2 · mobile camp	APPROVED camps
2.1	Government managers oriented	192	Bandhu 2 · training event	APPROVED events, audience = managers
2.2	Midwives / frontline providers trained	192	Bandhu 2 · training event	APPROVED events, audience = providers
2.3	GOB coordination meetings	16	Bandhu 2 · coordination meeting	APPROVED meetings, type = GOB
2.4	CBO / community-network meetings	16	Bandhu 2 · coordination meeting	APPROVED meetings, type = CBO
2.5	Community leaders / peer educators trained	160	Bandhu 2 · training event	APPROVED events, audience = community

2.6	Observance events supported	2	Bandhu 2 · coordination meeting	APPROVED events, type = observance
4.1	IEC / SBCC materials distributed	16,800	Bandhu 2 · IEC distribution + outreach	APPROVED IEC quantities
4.2	Public messaging displays installed	56	Bandhu 2 · IEC (displays)	APPROVED display-type IEC records

> The F-01 Wellness Logbook is deliberately the SINGLE counted source for 1.2, 1.3, 1.5a and 1.5b: Bandhu files no separate service forms for these, so one visit can never be counted twice.

PHD · 22 indicators

Code	Indicator	Target	Source form	How it is counted
SL1	FSWs receiving HIV/STI screening and FP counselling	3,500	PHD 2 · Service Log (clinic visit)	APPROVED clinic visits with screening / counselling services
SL2	GBV survivors identified and referred	100	PHD 2 · Service Log	APPROVED visits flagged GBV identification / referral
SL3	FSWs receiving mental-health counselling	100	PHD 2 · Service Log	APPROVED visits flagged MH counselling
SL4	Outreach sessions conducted	897	PHD 2 · group education / outreach	APPROVED sessions
SL5a	Condoms distributed	300,000	Stock entry (browser, monthly)	Sum of quantity issued for condom items, APPROVED entries only
SL5b	Syphilis screening kits	140	Stock entry	Sum of quantity issued, item name contains syphilis
SL5c	Hepatitis B kits	176	Stock entry	Sum of quantity issued, item name contains hepatitis B
SL5d	Hepatitis C kits	176	Stock entry	Sum of quantity issued, item name contains hepatitis C
SL5e	HIV screening kits	40	Stock entry	Sum of quantity issued, item name contains HIV
SL6	HIV/STI positive cases successfully referred	135	PHD 2 · test results + referrals	APPROVED positive results linked to a referral
SL7	GBV survivors referred for MHPSS	50	PHD 2 · Service Log	APPROVED visits with a GBV-to-MHPSS referral
SL8	Functional brothel-based SRHR centres	9	Service-centre register	Active centres
SL9	Providers trained	90	PHD training event	APPROVED events
SL10	Focal points oriented	30	PHD training event	APPROVED events, audience = focal points
SL11	Managers oriented	140	PHD training event	APPROVED events, audience = managers
SL12	Providers trained on inclusive SRHR and GBV	10	PHD training event	APPROVED events
SL13	Peer educators / community leaders trained	20	PHD training event	APPROVED events
SL14	Coordination meetings	18	PHD meeting form	APPROVED meetings

SL15a	Message boards installed	99	IEC / display records	APPROVED display records by type
SL15b	Signboards installed	9	IEC / display records	APPROVED display records by type
SL15c	Billboards installed	11	IEC / display records	APPROVED display records by type
SL16	GBV corners established and equipped	44	GBV corner record	APPROVED corner records

CIPRB · surveillance measures

Measure	Source form	How it is counted
Fistula cascade (suspected → diagnosed → referred → repaired → rehabilitated)	CIPRB 1 · Fistula Question Bank	One row per patient under a server-issued unique ID; each later stage updates the same row, so the cascade counts patients, not submissions.
Campaign reach (households, population, suspected)	CIPRB · Daily CHW Activity + the Q1/Q2 paper archive	Live daily tallies; archive quarters are fixed, labelled figures that take precedence for their upazilas.
MPDSR reviews (F1/F2/F4/F5), notifications (NS1/NS2), near-miss, social autopsy	CIPRB 2-9	One row per review or notification with a server-issued system reference (NS1-BH-0042 style); the dedup key includes district, date and name.
Response-plan completion	CIPRB 10 · MPDSR Response Plan	Every committee action tracked by its own ID (PA-001 style); completion percent averaged across approved actions.
Baseline verified interviews	Baseline FSW + Hijra instruments	CIPRB-verified interviews only; anomaly-flagged records are excluded until cleared.

If an indicator ever needs a new breakdown, the form must capture it first; the dashboard cannot show what was never asked. Form changes are made in the `build_*_forms` commands and redeployed with `--upload`. The paper-verbatim forms (MPDSR, near-miss) must never drift from the printed government forms.
